Do you have syllabus statements or materials I can use to introduce clickers to students?

It is recommended that you include information about clickers on your syllabus and in a Blackboard announcement, and that you discuss your course’s use of clickers during the first day of class.

You can use any of the following clicker statements (linked) in your course syllabus and also modify this PowerPoint slide (linked) for use in your introductory presentations to your students. Questions? Please submit an RT ticket.
