What-If Degree Audit

Before You Begin...

You can also use the What-If Degree Audit report to see how a student's existing classes will adapt to a change of major, or the addition of a second major and/or minor. The report will identify what additional classes are required, if any, and how many more credits are required to complete different majors. This is a great tool when working with students who are deciding upon a change of major or who are undeclared.

SA Tip
You can pull a What If Degree Audit for up to three (3) majors, minors or certificates at a time for a student.
