Add Administrator To Staff Computer

If you're getting a black screen when you log into the staff computer as an administrator. These are the steps add the local administrator as a user on the computer.

- Type "netplwiz" to get to the User Accounts

- Go to the Advanced Tab

- Click Advanced under Advanced user management
• Under Groups click on Users

• Click Add
• Click Locations and change it to the local PC
• Type administrator and click check names
• When you see "computer name\administrator" click OK
