How do I restore a deleted Confluence wiki page?

Tell me

1. Go to the **Space Admin** tab of the **Browse Space** view. To do this:
   - Go to a page in the space, open the **Browse** menu and select **Space Admin**.

   ❧ **Space Admin** is displayed only if you are a space administrator for that space or you are a Confluence system administrator.

2. Click on **Trash** from the left panel. A list of deleted pages and emails for the space is displayed.
3. Click on the **Restore** link beside the page you want to restore.

   ! If a new page has already been created in that space with the same name as the deleted page, you will be given an option to rename the page before it is restored.
