How do I create a Panopto recording?

Creating a Panopto recording is made possible by launching the Panopto recorder in one of two ways: either from within your course or from the desktop application. Follow the directions to create your recording.

Tell Me

1. **Login** to your Panopto course.
2. Click on **Panopto**.
3. Click on **Create**.
4. Click on **Record a new session**.
5. **Select** your desired folder for the recording.
6. Enter a **name** for your recording (can also be done after recording is complete).
7. Click on **Record** to begin your recording.
8. Click on **Pause** (to pause the recording, if desired).
9. Click on **Stop** to end the recording.
10. Click on **Upload** to upload your recording to the pre-selected folder.
